

All the hardware included

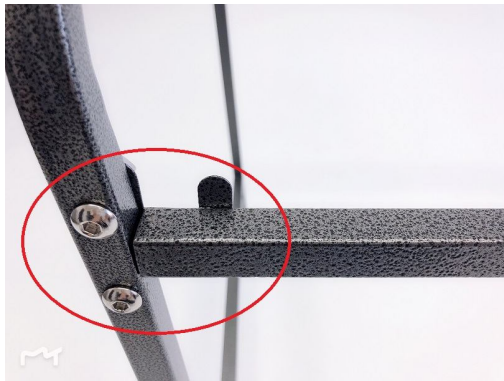

All cage parts included in the package.

All stand parts included in the package with seed catchers, perches, and feeders.

Attach the beam to the side of the stand by using #3 screws with nuts and washers

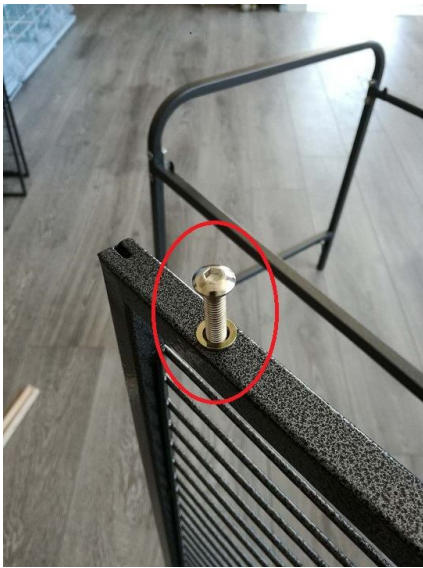

Make sure the metal pin on the beam is at the inside position so it can stop the cage from moving around

Attach the other beam to the stands

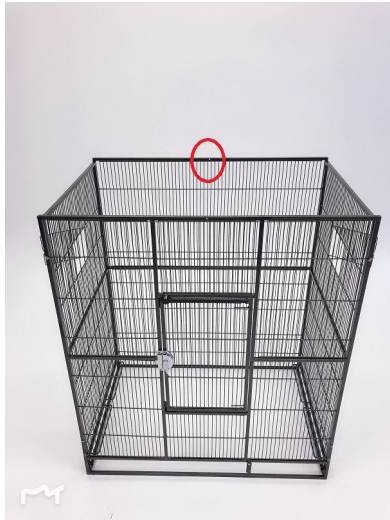

Attach the bottom shelf to the stands by using #3 screws. Put the screw in the built-in nut on the shelf, no extra nut needed.

Put on the wheels by using the given wrench

Attach the side panels with the front panel by using #2 screws

When attach the back panel, make sure the side with a little hole is at the up position

Attach the top panel; then put the cage on the stand (without any screws)

Put on screw #1 on both front and rear, but don't tight them yet

Hang front and rear seed catchers on #1 screw then tight them up. Then plug in the two side seed catchers

Slide in the metal grate at the higher position below the seed catchers

Slide in the plastic tray at the lower position

Put the perches and feeders at suitable positions and finish.
